

Total Runtimes

Addendum to

FLOware® Software User Guide - PN 22100080D

Available as of FLOware software version patch-2.9.3RunTimes

This addendum includes content destined for the *Using FLOware Software - Programming Basics - Main Window* section of the *FLOware Software User Guide*, PN 22100080D.

What is Total Runtimes?

Total Runtimes is an add on application that displays current accumulated “run times” in its own window.

Time Displayed

Run Time

The total amount of time (since the system started) that the system has been in *run mode* and *not* awaiting operator input.

Time spent awaiting parts is considered run time.

Idle Time

The total amount of time (since the system started) that the system has *not* been in run mode or has spent awaiting operator response to a message.

Using Total Runtimes

To access the Total Runtimes window:

1. Double-click the Total Runtimes icon located in the main window near the Editor icon.

The Total Runtimes window displays.

TIP: You may reposition this window anywhere on the screen.

2. As needed, you may reset the current accumulated times by pressing the Reset Times button.
